

AdvanceLogic™ Drop-in Charger

Designed for the IMPRES™ NI-CD, NIMH OR LI-ION

Available in Single Bay

MADE IN THE

AdvanceTec AdvanceLogic™ 4 Bay Drop-in for the MOTOROLA® IMPRES™, including the APX™ RADIOS

Part No. AT4-4000AL IMP (as shown above)*

The AdvanceLogic™ Conditioning Charger is a versatile, tri-chemistry conditioning charger, designed for everyday use with Motorola® radios with IMPRES™ and non IMPRES™ batteries.

Features

- + Drop-in charging for the radio with the battery or the battery alone
- + Rapid charge for non IMPRES batteries and Negative Pulse charging for IMPRES batteries
- + Automatically determines battery chemistry to provide correct accurate charging algorithm
- + Precise charge termination at 100% charge
- + No draining of the battery causing battery down-time and reduced battery life cycles
- + Safely top off the battery charge at any time
- + Switches into maintenance mode after reaching 100% charge

*Custom adapter plates allow you the convenience of configuring according to your radio and battery needs. Contact your AdvanceTec's sales rep for more information.
