The NeuLion Digital Platform is a fully managed platform that offers true end-to-end support from the point of content ingestion all the way through to the end-user experience on all consumer devices.

**LIVE AND VOD CONTENT INGESTION** from multiple sources including file, satellite and fiber.

**ADAPTIVE BIT RATE ENCODING** by the NeuLion MC Encoder supporting any format required including AVC, HLS, HEVC and MPEG-DASH for optimal delivery to target devices.

**LIVE EVENT EDITING** for publishing VOD clips from live streams and marking key events that are instantly available in the playback timeline, all through NeuLion’s web-based editor.

**CONTENT MANAGEMENT SYSTEM** provides detailed control over metadata attributes, geo-controls, subscription packages, merchandizing, pricing and more.

**MONETIZATION SUPPORT** for any combination of transactional, ad supported, SVOD, authenticated or EST (purchase/rent).

**CONTENT PROTECTION** including token-based security and studio-approved DRM.

**QUALITY OF SERVICE MONITORING** and analytics for audience measurement and ensuring audiences are receiving an optimized and reliable viewing experience.

**APP DESIGN AND CREATION** for leading consumer device models including web, mobile, tablet, connected devices, game consoles, smart TVs and wearables.
SEAMLESSLY EXTEND AUDIENCE REACH ACROSS MULTIPLE SCREENS
