

SPECTROLINE®

SB-450

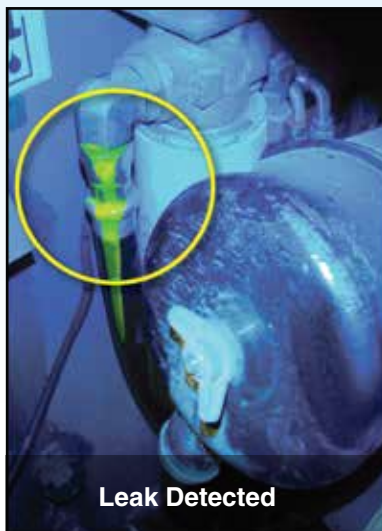

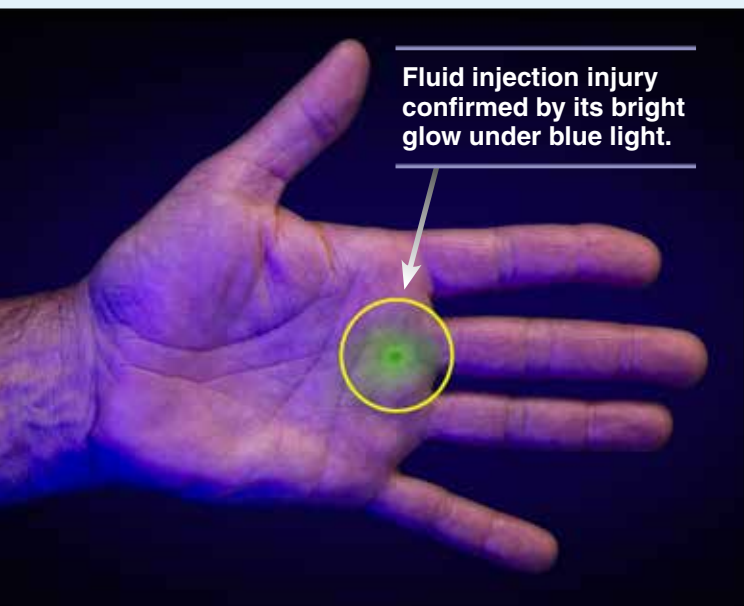

Blue Light Inspection Kit

Specially designed for use with FluidSafe™ fluorescent additive to quickly detect hydraulic fluid injection injuries under the skin. Also ideal for the fast and easy detection of small leaks in hydraulic system hoses, fittings, seals and other components. Perfect for mining industry applications!

- High-intensity, 450 nm blue light LED flashlight
- 100,000-hour LED service life
- Cordless, lightweight, ergonomic design eliminates fatigue
- Portable and rugged. Corrosion-resistant aluminum lamp body stands up to years of heavy use!
- Powered by a rechargeable NiMH battery
- Provides 90 minutes of continuous inspection between charges

The **SafetyBlu SB-450** kit comes complete with smart AC and DC chargers, yellow fluorescent-enhancing spectacles, a protective rubber bumper, a belt holster and a rugged, padded carrying case.
